- Check Tire Pressure Monthly: Underinflated tires wear faster and reduce fuel economy. Use a quality gauge and inflate to the manufacturer's recommended pressure, typically found on a sticker inside the driver's door.
- Inspect Tread Depth: Use the penny test: insert a penny into the tread with Lincoln's head facing down. If you can see the top of his head, it is time for new tires.
- Rotate Tires Regularly: Follow the rotation schedule recommended in your owner's manual, usually every 5,000 to 8,000 miles. Mitchum Tires Branson can perform this service quickly and affordably.
- Watch for Uneven Wear: If you notice one side of a tire wearing faster, it may indicate alignment or suspension issues. Bring your vehicle in for a professional inspection.
- Drive Smoothly: Avoid aggressive acceleration, hard braking, and sharp turns. Gentle driving reduces stress on your tires and extends their lifespan.
