The Origins of the Phrase "A Bee In Your Bonnet"

Like many idioms, **a bee in your bonnet** has roots in everyday life. Bonnets were common headwear for women from the 18th to early 20th centuries. A bee accidentally flying into a bonnet would create a frantic, buzzing disturbance that the wearer could not easily ignore. The first recorded use of the phrase appears in the early 1500s, though in a slightly different form. Scottish poet Gavin Douglas used a similar expression in his translation of Virgil's *Aeneid*(1513), writing about someone who "quhare ane be in the bonnet creipis" (where a bee creeps into the bonnet).

Over the centuries, the phrase evolved from a literal description to a figurative one. By the 19th century, "a bee in your bonnet" was firmly established in English vernacular, often appearing in literature and everyday speech. It was popularized by writers such as Robert Burns and later, across the Atlantic, by American authors.
