What Is The Postcode For Brisbane

Published: November 20, 2026 | Index ID: #-

Understanding Postcodes in Australia

When you ask "What Is The Postcode For Brisbane," you might expect a single number like 4000. However, Brisbane, the vibrant capital of Queensland, Australia, is a sprawling metropolitan area with dozens of suburbs, each with its own unique postcode. A postcode is a series of four digits used by Australia Post to sort and deliver mail efficiently. Unlike some countries where a single postcode covers an entire city, major Australian cities like Brisbane are divided into multiple postcodes that correspond to specific suburbs, localities, or even parts of the central business district (CBD). Understanding this system is essential for sending mail, ordering goods online, or simply navigating the city's administrative geography.

Brisbane's postcode system begins with the number 4000, which is assigned to the Brisbane General Post Office (GPO) and the immediate CBD core. But if you live in the suburbs—which most of the city's 2.5 million residents do—you will need a different postcode. The Gold Coast and Sunshine Coast, while part of the broader region, have their own ranges. So when someone asks "What Is The Postcode For Brisbane," the most accurate answer is: it depends on which part of Brisbane you are referring to. In this article, we will explore the various postcodes for Brisbane, explain how to find the correct one for any address, and highlight why using the right postcode matters for everything from shipping to emergency services.

Brisbane's General Postcode: 4000

The most commonly quoted postcode for Brisbane is 4000. This number covers the Brisbane General Post Office (GPO) and the central business district (CBD), including key streets like Queen Street, Adelaide Street, and portions of Spring Hill and Fortitude Valley. If you are sending mail to a business in the heart of the city, or if you are using a PO Box at the GPO, 4000 is the correct choice. However, it is a common mistake to assume that 4000 applies to all of Brisbane. In reality, the city's postal zones extend far beyond the CBD, and each suburb—from Alderley to Zillmere—has its own unique four-digit identifier.

For example, the trendy suburb of New Farm has a postcode of 4005, while the riverside neighborhood of Kangaroo Point uses 4169. Even within the CBD, there are slight variations. The area known as Brisbane City (excluding the GPO) sometimes receives mail addressed to 4001, which is used for the CBD's residential and business addresses. This layered system can be confusing, but Australia Post provides official lists and tools to ensure accurate addressing. When you search "What Is The Postcode For Brisbane," you will often see 4000 listed first, but remember that it is just the tip of the iceberg.

Major Suburbs and Their Postcodes

To give you a better idea of the range, here is a list of some well-known Brisbane suburbs and their corresponding postcodes. This is not an exhaustive list, but it covers many areas residents and visitors commonly search for.

- Brisbane CBD / GPO: 4000
- Brisbane City (residential): 4001
- Spring Hill: 4000 — though parts use 4004 for some properties
- Fortitude Valley: 4006

- New Farm: 4005
- South Brisbane / West End: 4101
- South Bank: 4101 (shared with South Brisbane)
- Highgate Hill: 4101
- Woolloongabba: 4102
- Annerley: 4103
- Greenslopes: 4120
- Tarragindi: 4121
- Holland Park: 4121
- Mount Gravatt: 4122
- Upper Mount Gravatt: 4122
- Eight Mile Plains: 4113
- Runcorn: 4113
- Sunnybank: 4109
- Sunnybank Hills: 4109
- Calamvale: 4116
- Darra: 4076
- Indooroopilly: 4068
- Toowong: 4066
- St Lucia (University of Queensland): 4067
- Auchenflower: 4066
- Bardon: 4065
- Ashgrove: 4060
- The Gap: 4061
- Kenmore: 4069
- Chapel Hill: 4069
- Fig Tree Pocket: 4069
- Nundah: 4012
- Clayfield: 4011
- Hamilton: 4007
- Eagle Farm: 4009
- Pinkenba: 4008
- Wynnum: 4178
- Manly: 4179
- Cleveland (Redland City, near Brisbane): 4163
- Carindale: 4152
- Carina: 4152
- Camp Hill: 4152
- Coorparoo: 4151
- Norman Park: 4170
- Morningside: 4170
- Balmoral: 4171
- Hawthorne: 4171
- Bulimba: 4171
- Sherwood: 4075
- Corinda: 4075
- Oxley: 4075

- Graceville: 4075
- Mount Ommaney: 4074
- Jindalee: 4074
- Riverhills: 4074
- Forest Lake: 4078
- Doolandella: 4077
- Inala: 4077
- Richlands: 4077
- Goodna (Ipswich area, sometimes considered Greater Brisbane): 4300
- Springfield: 4300
- Ipswich CBD: 4305

This list shows that Brisbane postcodes range from 4000 up to the low 4200s for outer suburbs like Albany Creek (4035), and even into the 4500s for areas like Petrie (4502) and Kallangur (4503), which are part of the Moreton Bay Region but often considered Greater Brisbane. There is no single answer to “What Is The Postcode For Brisbane,” because the city’s postal boundaries reflect its growth and subdivision over decades.

How to Find the Correct Postcode for a Specific Address

If you are unsure about which postcode applies to a particular Brisbane address, there are several reliable methods to find it. First, Australia Post maintains an official online postcode finder on its website. Simply enter the street address, suburb, or locality, and the tool returns the correct four-digit code. This is the most authoritative source because Australia Post manages the postal system. Second, many mapping services like Google Maps include postcodes in their location data. When you search for a business or residence in Brisbane, the postcode often appears in the information panel. Third, you can reference the official Australia Post Postcode Guide, which is published annually and lists all postcodes for every suburb in the country. Libraries and post offices usually have copies.

It is also helpful to know that Brisbane’s postcodes generally follow a geographic pattern. The CBD and inner suburbs (within about 5 km of the city center) use codes around 4000–4179. Middle-ring suburbs (5–15 km out) use codes in the 4030–4120 range and 4150–4170 range. Outer suburbs and rural areas to the north, south, and west may use codes up to 4500 or even 4600 in some cases. However, exceptions exist—for example, parts of the inner suburb of Newstead share postcode 4006 with Fortitude Valley. Always verify with an official source rather than guessing, especially for important correspondence or online orders.

Importance of Using the Right Postcode for Brisbane

Postal Delivery Efficiency

Using the correct postcode ensures your mail reaches its destination without delay. Australia Post’s sorting machines rely heavily on postcodes to route letters and parcels. A wrong postcode can send your item to a different sorting facility, causing days or even weeks of delays. For time-sensitive documents like bills, legal papers, or medical prescriptions, accuracy is critical. Additionally, if you are running a business that mails invoices or promotional materials to Brisbane clients, mixing up postcodes can damage your reputation and waste money on returns.

Online Shopping and E-commerce

E-commerce platforms use postcodes to calculate shipping costs, delivery times, and availability. If you enter the wrong postcode for your Brisbane delivery address, the system may quote longer transit times, higher fees, or even

decline to ship altogether. For example, a seller might see that postcode 4000 is within metro Brisbane and offer next-day delivery, but your actual address in Chapel Hill (4069) might be considered a suburban area with 2–3 day delivery. Entering the correct postcode from the start avoids confusion and ensures you receive accurate shipping options. Many online retailers also use postcodes to determine whether a location qualifies for free shipping thresholds.

Location-Based Services

Postcodes are increasingly used for services beyond mail. Banks, insurance companies, and utility providers use postcodes to verify your location for address verification and risk assessment. Emergency services sometimes reference postcodes to dispatch responders, though they rely more on street names and suburb names. Real estate websites use postcodes to filter property listings, and job boards often let you search for opportunities near a specific postcode. Using the right postcode for your Brisbane home or business helps you get accurate results from these systems.

Common Misconceptions About Brisbane Postcodes

One of the biggest misconceptions is that all of Brisbane shares a single postcode. As discussed, the city is divided into many zones. Another myth is that the postcode 4000 can be used for any address in Brisbane CBD. While 4000 covers the GPO and some parts of the CBD, many buildings within the CBD actually use 4001 or other codes.
